## Summary

I am a software engineer with 3+ years of experience in creating Android applications. I aspire to create maintainable, clean and robust code that is easy to change and reuse.

To efficiently communicate with other team members and understand higher-level problems, I always try to expand my knowledge in related areas, e.g. backend development, UI / UX, product management etc.

I also have experience in team management, gathering requirements from clients and product owners, creating documentation and interviewing developers.

I prefer working remotely and I am able to organize efficient remote workflow (both for myself and for the team).

## Skills

### Android

Android SDK, Java, Kotlin, RxJava, Retrofit, Dagger 2, Gradle

Clean Architecture, MVP, MVVM

Camera2, Custom Views

Jetpack Navigation, Room, DbFlow, FCM, Firebase Storage

Espresso

### Other
